SATURDAY MORNING, OCTOBER 8, 1859. of ables or and complete dissection of the control of the control

Our Government and the Pitter Severnment seems to be acting with ners than its usual energy to arrest the filibustring proceedings of WALER and his associates. t must, however, rely much upon the zeal and delity of its officers at the Southern ports ; but hould they be convinced that the authorities at Washington are in earnest, and that any remiseness in the performance of their duty would bring prompt dismissal, they will act with the requisite vigor and determination.

Heretefore, the apathy, or the positive symothy of Government officers, with WALKER'S ter movements, has encouraged him in his iratical adventures; and the countenance given him, by a portion of our ditizens, in different parts of the country, and especially in the South, has also had its influence in securing him immunity from merited punishment. Now, the tide of opinion throughout the Union runs strongly gainst WALKER and his projects. His acts in Nicaragua, during his brief usurpation of authere, have caused his character to be stemped with an indellible stigma. It is only strange that he can still deceive some by his worthless promises, or gather around him any number of fell wers.

We trust that our Government will not only succeed in frustrating his present designs, but that it will convince him that he cannot, with impunity, any longer carry on within the United States bis cor spiracies against the peace and property of friendly States, and that their weakness will only give them an additional chim to our protection against piratical expedi-

pondent of the London Times advance a new theory to account for the terrible repulse of the British at the mouth of the Pelho. He ces not believe the story that Russians directed the operations of the Cninese, though a few renegade Europeans may have been among them. His theory is that the men who conducted the operations on the Chinese side were Calmucks, a Canonesian tribe, which, in the reign of the Empress CATHARINE, suddenly emigrated in a body from their native hills into Chinese territory.

This correspondent says that when on a tour in the Caucasus and adjacent provinces, in 1838-9, he learned from intelligent Russian officers the facts regarding this emigfation-an event without parallel in the history of the world from its first creation, with the exception of the exedus of the Israelites from Egypt. The Bussians attempted to intercept the flight of the Calmucks. When, after suffering extraordinary hardships, the emigrants who survived their terrible march had reached the Chinese frontier, they found a powerful Russian force drawn up bar their further progress. Worn out and exhausted, they yet contrived to force their way, and reached the Mongol territory, the Russian troops following in bot pursuit. Scarcely, however, had the Kussians crossed the boundary efore a murderous fire of musketry and artillery was opened upon them, and they were bliged to cetreat.

Thunderstruck at this unexpected repulse, the Russians, having gained their own territory re-formed on the borders of a lake, but being still completely under the range of their enemy's guns, which played upon them incossantly, a fearful slaughter followed, and the remnant of the Eussian force broke and fled in all directions. What most surprised the Russians was, not a much the bravery and discipline of the Calmucks, as their superior train of artillery, and the admirable manner in which it was served. The murderous precision of the Calmuck gunners utterly paralyzed the Eussian soldiers.

The correspondent, who visited China in 1856, says that he asked some intelligent Chinese why the Calmuck troops were not brought down to fight the British. The rep'y was to the effect that it would be like inviting the wolf to take care of the sheep. They might easily be brought down, but it might not be so easy getting them back again. But this objection would not apply to a theatre of action so far north as the Peiho, and it is therefore surmised that the British met the Calmucks for the first time in the affair on the Peiho. If the surmise be correct, then may we say to the allies, "Look out, hereafter, for the Ca mucks."

The shooting of the daughter of President GEFFRARD on the 10th Sept., was the signal for a general rising by a party of conspirators against the Government, but as prompt measures were taken, and about 45 of them arrested, quietness soon prevailed. They are having their trial, and will, no doubt, soon be shot. Gen. PHROPET, one of Scullouque's Monisters has been banished.

The Stephens and Spepberd Case. The Albany Evening Journal says of the decision of the Court of Appeals in these two cases :-

The principal question in the case of STAPHENS Was The principal question in the case of Systemsas was, whether the jury, in a capital trial, may be permitted to separate. It was settled that such a separation, permitted by the Judge, with the express assent of the prisoner and his councel, in note, w. in law.

In the Suscitant case, in which, coming from the General Sessions of New York city, the Court of Appeals is required to examine the facts, the unanimous clinion was, there was very great doubt how the free originated. It could not be said that there was even a strong probability that it was set by the prisoner. There were circumstances of suspicion, but nothing whatever to warrant a capital conviction.

Extentive Barglary.

Albany, Oct. 7.—A large robbery was commit-ted in this city last night, Hoop & Tonar's jewelry store having been completely stripped of its con-

tents.

The robbery at Hoon & Toner's jewelry stere is said to have been effected by an entry through the back cellar door, and through the flooring into the store. The jevelry steller consists mainly of watches, chains, and diamonds. Most of the watches have Hoon's name on. The worth of the property stolen is attimated by the proprietor at from \$20,000 to \$30,000. The police are engaged in thoroughly sifting the matter.

Cincinnati, Oct. 7.—In the Cincinnati trotting park, this afternoon, Flora Comple and Rice Cook were matched for \$1.000 a side. The race was won by the foruser in three straight heats, viz: 2:71, 2:77, 2:214. The last heat was the fastest on record, and the first half unite of it was made in 1:00%.

The London Morning Herald gives prominence to the following paragraph: "We have reason to believe that a definitive treaty of peace will soon be concluded at Zurich. It will, however, bear the signatures of only two powers, France and Austria."

A Borne telegram says, a courier from Vienna had reached Zurich, with instructions to draw up a treaty of peace, and a decument for the cassion of Lombardy to Sardinia. No allusion is made to the Duchies. It is hoped that a treaty will be signed in a few days.

The screw steamer Fox, Capt. McCLINFOCK, sent by Lady Franklin to the Artic regions in search of the traces of Sir John Franklin's expedition, had returned to England, having been completely successful. At Point William, on the N. W. coast of King William's Island, a record was found, dated April 70th, 1848, signed by Capts. Cozum and Franklin. The record says, the Erobus and Terror were abandoned three days previously on the lee, five lengues to the N.N.W., and that the survivors, in all amounting to 10s, were proceeding to Great Fish River. Sir John Franklin had died June 11th, 1847, and the totla deaths to date had been nine officers and fifteen men.

Many deeply interesting relies of the expedition were found on the western shore of King Williams Island, and others were obtained from the Esquiraux, who stated that after their abandonment, one ship was crushed in the ice and sunk, and the other forced on shore, where she remained.

Several skeletons of FERNELIN's men, large quantities of clothing, &c., and a duplicate record, up to the abandonment of the ships, was discovered.

BLAND OF SAN JUAN.

The American occupation of the Island of San Juan attracts considerable attention in the journals. The Times editorially states the facts of the case, and says: Fortunately, the affair is in good hands, and we trust there can be no reason to doubt that the governments of the two countries will proceed to a decision in the same spirit of moderation and equity by which their views of the question have hitherto been characterized.

The atticle concludes as follows:—"It is not a question of convenience, but of justice. The decision should depend upon the terms of the treaty, 'airly interpreted, and it was evidently not deviated by either Government a short time ago, that this interpretation could be discovered. If, however, it should prove that the existing convention cannot be so applied as to satisfy the contracting parties, there can suitely be no reason why two States, which have now adjusted their respective limits across an entire continent from the At antic to the Pacific, should not complete the work in the narrow waters of Vancouvers Island. The Americans may assure themselves that in such negotiations they will meet with no feelings but those of fairness and amity on the part of this country. It would be hard, isdeed, if children of the same stock, who can feel the sympathies of blood and lineage, as they were felt and expressed in the waters of the Felho, should find much difficulty in adjusting a petty boundary question on the coast of the Pacino.

MISCELLANEOUS SUNDECTS.

MISCELLANGOUS SUBJECTS. Thirty of the crew of the Great Eastern had been arrested and tried at Weymouth for mutinous conduct in refusing to wash the decks when ordered. The English journals strongly denounce the incomplete and hurried manner in which the ship was sent to sea. A vague rumor has been current that her first voyage would be postponed until next year, and that in the interim she would be exhibited at the principal parts in the Kingdom. This, llowever, is authoritatively contradicted, and she is still advertised to leave Holyhead for Portland, on the 20th of October.

leave Holyhead for Portiand, on the 20th of October.

Upwards of a thousand marines, strong detachments of the Rufe Brigade, two Light Infantry Regiments, &c., were to leave England for China, by the overland route. The Government intended dispatching fifty gunboats, besides frigates and other vessels. Bir Cusack Roner writes to the Dublin journals, positively asserting, that the Government intends etting aside the Galway mail contract at the next session of Parliament. An order for two millions bales cartridges packed in 200 boxes had been executed at Woolwich in three days, including the stowing on ahipboard. These go to China overland, and a second order to a much greater extent, was progressing for the sea voyage.

A meeting had been held in Manchester to hear from Rev. Mr. Bowse, an exposition of the origin and objects of a society formed in the United States, for planting colonies in Central and other portions of Africa, with the view of civitizing that region and pron oting the growth of cotton. Resolutions approving the movement and pleading support were adopted.

The Lordon Advertiser gives a report that Roner Stremenos, the great engineer, is dangerously ill.

THANCE.

The Times' correspondence says the great report of the day was that the question of the Duchies had been arranged; that Tucany is to be reigned over by the King of the Beigians second son, and Parma and Modena by MAXIMILIAN. Another report says the Count de Flanders is to have the three Italian Duchies, and the Archduke MAXIMILIAN Venetia, with separate constitutions. These reports must be taken for what they are worth.

Another Paris rumor was to the effect that there is to be no chance expedition, that the head of the Peiho Mandarin had been profilered in atonoment, coupled with premises of all the satisfaction required, and that the Ambassadors will be immediately received at Pekin.

Tariest.

The Paris correspondent of the London Spectator, who has, on several occasions, communicated early and authentic news, asserts that Narollson accepts the plan of the King of the Belgians, which is to give the fortresses of Peschiora and Mantus, and the States of Parma and Modena to Sardinia, to reinstate the House of Lorraine in Tuscany, and restore the Legations to the Pope. After the introduction of a variety of reforms, Venetia is to have governmental institutions and an army of its own, under the Archduke Ferdinando Maximilan, with the title of Grand Duke of Venetia. This stiputation has the concurrence of Austria. A Congress is also to be reld at Brussely, presided over by the King. This istiter is dated evening of the 22d.

CITY NEWS.

DESTRUCTIVE FIRE IN WASHINGTON STREET —COPPER AND SPICE MILLS DESTROYED.— LOSS OVER \$70.000.—The Eighth District alarm, at a few minutes before nine o'clock, last evening, wise caused by the breaking out of a fire in the lower portion of the building Nos. 235 and 237 Washington street, owned and occupied by Whisers, Gilling & Brothers, dealers in coffice, spices and teas.

Owing to the combustible nature of the stock, the flames spread with great rapidity, and twenty min-utes after the discovery of the fire the walls of both buildings were level with the ground. The stock in the building Number 239 Washington street, which was occupied by Schulmann, Hamon & Co., flour dealers, was damaged by fire and water about \$3 000, and said to be insured. The ouldings cocupied by the firm of WRIGHT GILLIES & Brother, were three story brick structures, and for-merly belonged to the cetate of WM. RYLANDER. The naured. The stock in these buildings was worth about \$60,000. There is said to be an insurance on the stock and buildings, and a large amount of which is in the Hami-ton, Beckman, Irving, St. Marks, St. Micholas, New Amsterdam, Williamsburgh, and Jersey City Insurance Companies. The adjoining three story brick building, belonging to the RYLANDSS estate, No. 239, was damaged about \$600 and insured for \$2,000 in the North River and Greenwich Insur-

ance Companies.

The upper portion of No. 933 was occupied as a dwelling by ex-councilman Trowas Moons, and his loss is about \$300, on which there is no insurance. The fire is supposed to have been caused by a defect in the furnace connected with the engine. The firemen worked gallantly, and it is foared that some of them were injured by the falling of the walls of the buildings Nos. 235 and 237, but owing to the confusion particulars could not be obtained.

THE idea of a Westchester County Railroad being built in the streets of this city, as aliuded to yesterday, is quite a new fone, and it was doubtless ntended to steal a march on us that the provisions of the act relating thereto were framed. Friday, at the Sixth Ward Station House, upon the body of Michael Carley, not Michael Correct, as previously stated, who died at the New York Hospital from the effects of a stab in the left breast, inflicting that Sunday evening by a woman named Mangary Sheringar. This woman, immediately after inflicting the wound, fled, and was arrested by officer Jourdan in Yonkers, N. Y., where she had engaged at service in a family.

Three girls, daughters of the deceased, were present, and seemed to take a deep interest in the proceedings, and several witnesses were examined, and their bestimony went to show, that lest Saturday evening, the woman Shiraday was deceased passing her residence, No. 476 Fearl street, in the rear, and instantly became enraged at him, declaring that he had stolen 50 cents out of her room. She was cutting a lemon at the time, and flourishing the kuffs, said: "There goes the son of a b....., he who robbed me of my hard carnings: as little as it was, it was my all. I'll win this kuffe through him as far as it will go." If Ladies' Gemnasium.—A new Gymnasium, for the ladies slone, was inaugerated on Wednesday evening, by remarks from Hasser Ward Basserse and others. Mr. Basserse thought that ladies had no occupation except sweeping the streets, now; that their own sweeping had been given over to do-mestics, and that they had better drive horses for ex-erciself they could find nothing else to do. The Gymnasium is opened by a Miss Hall, and is loca-ted on Atlantic street, nearly opposite the Athe-nseum.
